IPCC ROOT
## Princeton/Intel Parallel Computing Center

Progress Report

Vassil Vassilev, PhD

03.10.2017

Status 12.09-2017—02.10.2017

✤ We presented our <u>proposal</u> to the ROOT team

  ✤ The feedback was that we should switch from in-tree benchmarks to a dedicated repository rootbench.git

✤ Created <u>rootbench.git</u> and we started setting up the infrastructure around it:

  ✤ During this process we discovered a few bugs in the setup of VecCore and cmake

  ✤ We landed a few benchmark patches. Still a few more to come.

Status 12.09-2017—02.10.2017

✤ We were asked by the IPCC office to propose a plan for next year.

✤ We spent some time discussing and writing a tentative work plan to send back

Thank you!
