Progress Report

Vassil Vassilev, PhD

29.03.2018

Status 15.03.2018—28.03.2018

- ❖ Infrastructure:

- ❖ Created a TDF grafana dashboard
- ❖ Moved to Ubuntu Xenial on TravisCI using docker.

Status 15.03.2018—28.03.2018

- ❖ I/O and Reflection:
 - ❖ Working on further improving the startup time by delaying the deserializations of declarations (in cases of classes with non-inlined virtual table key functions).
 - ❖ A proper fix in is still being investigated. Currently we outline the first virtual function which fixes the issues in code which is under our control (such as ROOT).

Status 15.03.2018—28.03.2018

- ❖ I/O and Reflection:
 - ❖ Working on a few long-standing pull requests

Thank you!
